

Plan Name	SB Neighborhood-based Districts
Description	<p>This map creates districts that follow meaningful boundaries. It keeps neighborhoods together while maintaining population equality.</p>
Created By	Brendan Barnwell
Organization	None
Analysis	<p>The districts as drawn can be easily described in terms that will make sense to Santa Barbara residents:</p> <p style="padding-left: 40px;">District 1 - Westside (Las Positas to Montecito, 101 to Harding School area)</p> <p style="padding-left: 40px;">District 2 - Eastside (Anapamu to Beach, Santa Barbara Street to APS/Salinas)</p> <p style="padding-left: 40px;">District 3 - Mesa/Waterfront (including Campanil, Bel Air, West Beach, and the Funk Zone)</p> <p style="padding-left: 40px;">District 4 - Upper State/Oak Park (including Hope, La Cumbre, Hidden Valley and Samarkand)</p> <p style="padding-left: 40px;">District 5 - San Roque and the hillside neighborhoods (Foothill, Riviera, Eucalyptus Hill)</p> <p style="padding-left: 40px;">District 6 - Downtown (including west downtown and the upper east side)</p> <p style="text-align: center;">Notes:</p> <p>Note 1: The Westside district as drawn does not have a Hispanic majority among the Citizens of Voting Age Population (CVAP). None of the five maps submitted by the public so far achieves a Hispanic CVAP majority in this area either, nor do any of the three city draft maps (although one achieves an exact 50% by splitting a census block). It is almost impossible to draw a district here with Hispanic CVAP majority. A bare majority (more than 50% but less than 51%) can be achieved by methodically gerrymandering the district to specifically include only the individual census blocks with high Hispanic CVAP. The "core" Westside neighborhood -- extending from Mission Street to Montecito Street, and from the 101 Freeway to Gillespie Street, has a total population that is over 70% Hispanic, but less than one third of this Hispanic population is CVAP according to the census data supplied in the ESRI districting tool. This means that, in any Westside district, a large proportion of the target district population is "used up" by including nonvoting Hispanic population, leaving little room for error in including CVAP of other racial/ethnic groups. Creating a district with an absolute Hispanic CVAP majority (which was apparently a goal of the legal settlement) may not be possible unless all other district-drawing goals (e.g., neighborhood cohesion) are abandoned. As drawn, however, the total population of this district is over 65% Hispanic.</p> <p>Note 2: The Eastside district as drawn does not have a Hispanic CVAP majority. However, it is close (about 49.4%). If an absolute majority is needed, it can be achieved by trading a few census blocks at the borders with neighboring districts (e.g., Eucalyptus Hill, along Anapamu and/or Santa Barbara Streets, and the area around Chiquita Road). An absolute majority may also be achievable by splitting census blocks, as is done in the city draft maps. As drawn, however, the total population of this district is over 67% Hispanic.</p>
